Project Design Phase-2

Customer Journey Map

Date	09 NOVEMBER 2022	
Team ID	PNT2022TMID43503	
Project Name	Project – Natural Disaster Intensity Analysis and Classification Using Artificial Intelligence	
Maximum Marks	4 Marks	

Customer Journey Map for "Natural Disaster Intensity Analysis and Classification Using Artificial Intelligence":

Step-1: Goals and needs

Game changers are people who introduce new practices to their organizations. They want inspire others to co-create and innovate together.

What are their key goals and needs?

Calculate the intensity of Natural disasters Reduce the loss of life

What do they struggle with most?

Detection of natural disasters still faces issues due to the complex and imbalanced structures of images.

What tasks do they have?

They give images as input using webcam They just give images it will produce accurate results

Early Classification of natural disaster

Step 2: Journey Steps

Journey Steps Which step of the experience are you describing?	Discovery Why do they even start the journey?	Registration Why would they trust us?	Onboarding and First Use How can they feel successful?	Sharing Why would they invite others?
Actions What does the ustomer do? What nformation do they look for? What is their context?	Customer look for the country look for the clock for the clock for the clock for the country look for the country	Connect with the gase Emergency Take photo account	prepared stay in a safe practice Stay eness or a safey drifts and updated and updated	Creating sharing the desired from the de
leeds and Pains What does the customer want o achieve or avoid? ip: Reduce ambiguity, e.g. by sing the first person narrotor.	Unicaridad Popup Advertisament Messages	trelevent Multiple verification Fyzied informations steps information	Try no to be: Always inco. Fun for proper autrenced paint emergency alternate paint set beation conducted	Sharing Sharing the strength of the strength of the strength of the sharing sh
Touchpoint What part of the service do hey interact with?	Press/Media social media Advertisement Fiyers Telemarketing	Email Adentumes google notification	always keep listen to local different for a list officials kinds of visicustom firs a list officials kinds of disaster plan	sharing sharing exhibitions different book clothe to propositive the people bland the disease.
ustomer Feeling Vhat is the customer feeling? ip: Use the emofi app to xpress more emotions	•	©	②	©

Opportunities What could we improve or ntroduce?	A website can be created which identifies	The website can be made secure and more accurate so that it will	The customers can give a image as Input and the type of natural	The website can be made available to everyone who need to
rocess ownership Who is in the lead on this?	After he website is created in will be on Charge of to Charge of Notice;	The NORF scan in the load of the website.	The NGRF team in in its last of the webbits	The NORF feature in in lead of the withder miro

Step 3: Journey Outcomes

What changes for them?

Outcome

Describe how the life and environment of the customer changes once they used the product or service.

What are they able to do now?

Customers can easily identify the type of natural disaster. Easy to identify the natural disaster when disaster image given as input.

Intensity identification when given a disaster image as input.

What can they finally avoid doing?

No need for the continuous searching for the type of disaster. No need to worry about the intensity calculation of that disaster. They may not worry about image quality. Produce accurate result.

What changed in my environment?

Earlier Identification of natural disaster and intensity analysis. Due to the product, there is a reduction of risk due to disaster.

The loss of lives and ecosystem are prevented due to easier identification
